

Installation and Update process LiveZilla 7.x

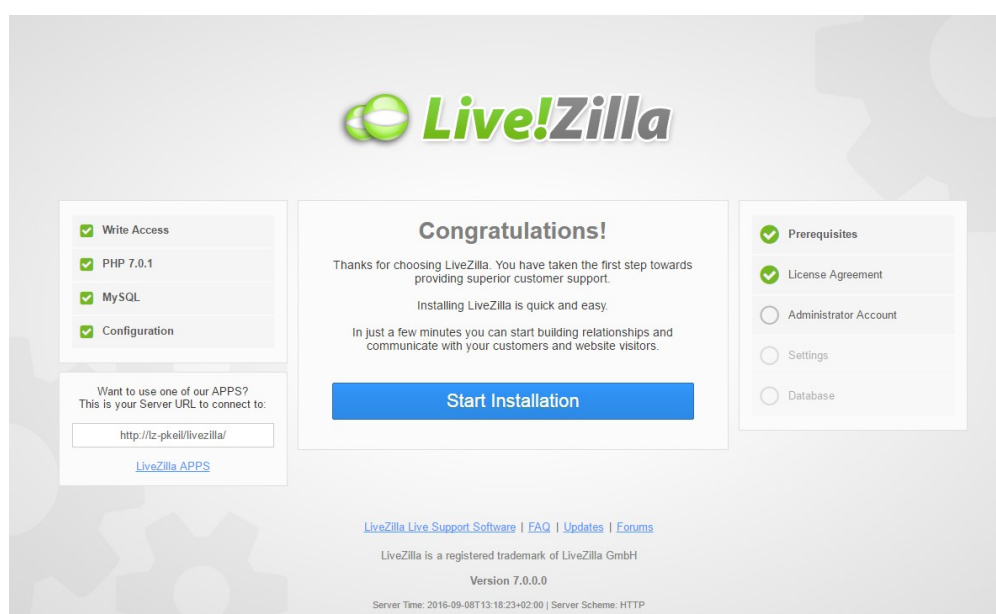

(BETA Version)

Please follow the next steps:

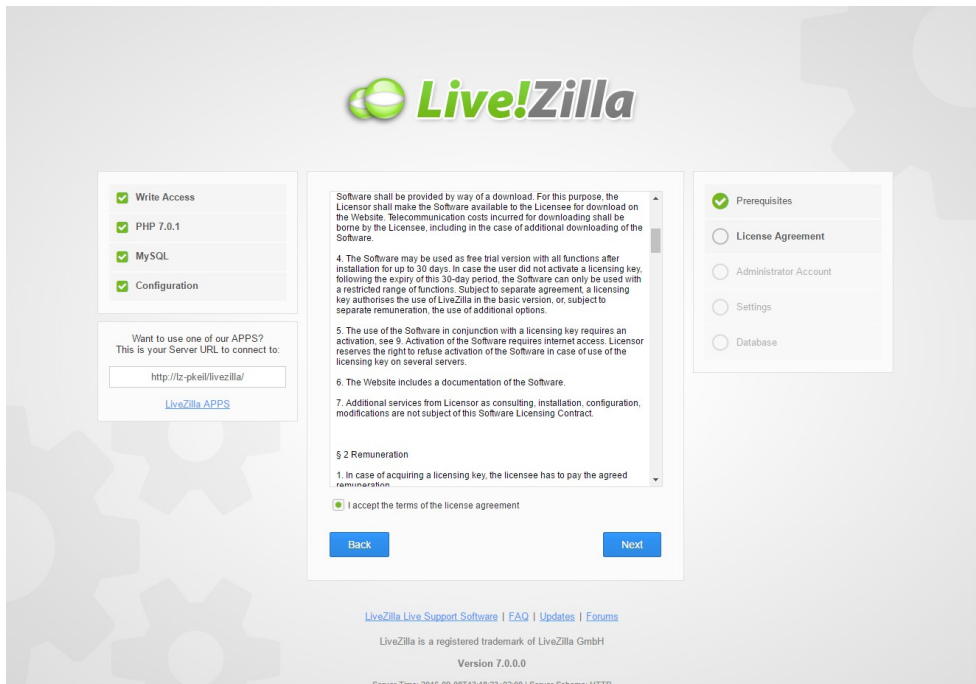

1. Download the latest LiveZilla version from here:
<http://www.livezilla.net/downloads/en/>
2. Unzip the ZIP file to a folder on your hard drive
3. Open your FTP client und start uploading the files to your web server

Important when performing an UPDATE!

4. Please make absolutely sure that you upload the files to the **same** folder as you did in the initial installation!
5. Now open the web browser and go to the URL to which you uploaded the LiveZilla files. If the upload was successful you will see the LiveZilla Welcome Screen. If you don't see the Welcome Screen please upload the files again to your web server.

6. After the system requirements were verified you can click on „start installation“ and follow the next steps. First you need to agree with the license agreement.

The screenshot shows the LiveZilla installation prerequisites screen. The LiveZilla logo is at the top center. On the left, a box lists checked prerequisites: Write Access, PHP 7.0.1, MySQL, and Configuration. Below this is a link to 'LiveZilla APPS'. In the center, a scrollable text area contains the license agreement, including terms of use, trial version details, and remuneration. At the bottom of this area are 'Back' and 'Next' buttons. On the right, a box shows 'Prerequisites' with 'License Agreement' checked and 'Administrator Account', 'Settings', and 'Database' unchecked. The footer contains links for support, FAQ, updates, and forums, along with version and server information.

Software shall be provided by way of a download. For this purpose, the Licensor shall make the Software available to the Licensee for download on the Website. Telecommunication costs incurred for downloading shall be borne by the Licensee, including in the case of additional downloading of the Software.

4. The Software may be used as free trial version with all functions after installation for up to 30 days. In case the user did not activate a licensing key, following the expiry of this 30-day period, the Software can only be used with a restricted range of functions. Subject to separate agreement, a licensing key authorizes the use of LiveZilla in the basic version, or, subject to separate remuneration, the use of additional options.

5. The use of the Software in conjunction with a licensing key requires an activation, see 9. Activation of the Software requires internet access. Licensor reserves the right to refuse activation of the Software in case of use of the licensing key on several servers.

6. The Website includes a documentation of the Software.

7. Additional services from Licensor as consulting, installation, configuration, modifications are not subject of this Software Licensing Contract.

§ 2 Remuneration

1. In case of acquiring a licensing key, the licensee has to pay the agreed remuneration.

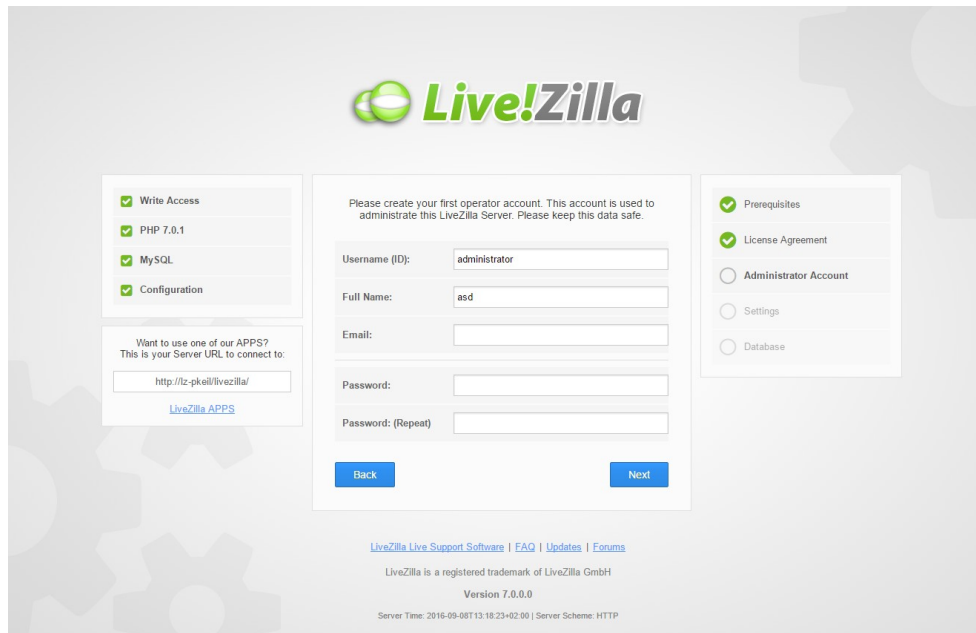

☒ I accept the terms of the license agreement

7. Afterwards you create an administrator account for your LiveZilla installation which will concurrently be your first operator account.

The screenshot shows the LiveZilla installation administrator account creation screen. The LiveZilla logo is at the top center. On the left, a box lists checked prerequisites: Write Access, PHP 7.0.1, MySQL, and Configuration. Below this is a link to 'LiveZilla APPS'. In the center, a form titled 'Please create your first operator account. This account is used to administrate this LiveZilla Server. Please keep this data safe.' contains fields for Username (ID), Full Name, Email, Password, and Password (Repeat). At the bottom of this form are 'Back' and 'Next' buttons. On the right, a box shows 'Prerequisites' with 'License Agreement' checked and 'Administrator Account', 'Settings', and 'Database' unchecked. The footer contains links for support, FAQ, updates, and forums, along with version and server information.

8. In the next step you can configure the settings for the usage and retention of cookies as well as the masking of IP addresses.

The screenshot shows the LiveZilla configuration interface. At the top is the LiveZilla logo. The main area is divided into three columns. The left column contains a list of checked items: Write Access, PHP 7.0.1, MySQL, and Configuration. Below this is a section for server URL with a text input field containing 'http://lz-pkell/livezilla/' and a link to 'LiveZilla APPS'. The middle column has a heading 'Please configure according to your local data privacy regulations.' and contains settings for cookies and IP masking. The 'Set Cookies' section has a checked checkbox and a 'Cookie Lifetime' of 100 days. The 'Mask IP Addresses' section has a checked checkbox, a 'Format' dropdown set to '123.321.xxx.xxx', and a 'Respect DNT Header' checkbox. At the bottom are 'Back' and 'Next' buttons. The right column shows a list of prerequisites: Prerequisites, License Agreement, Administrator Account, Settings, and Database, with the first three checked. At the bottom of the page are links for support, FAQ, updates, and forums, followed by version and server time information.

Database

9. Finally you create the MySQL database respectively fill in the credentials for your existing MySQL database and create the tables.

The screenshot shows the LiveZilla configuration interface for database setup. The layout is similar to the previous screen. The left column has the same checked items. The middle column has a heading 'Almost done! To use LiveZilla, you must create a MySQL Database.' and contains fields for MySQL Engine (MyISAM), MySQL Extension (MySQL), Host (localhost), Database Login (root), Database Password, Database Name, and Table Prefix (lzTEST_). At the bottom are 'Back' and 'Create Tables' buttons. The right column shows the same prerequisites, with 'Settings' now checked and 'Database' unchecked. The footer information is identical to the previous screen.
